

Environmental Sustainability Policy

1. Purpose

To define TQTI's commitment to environmental sustainability by implanting responsible practices into its operations, training programs, and institutional culture — ensuring long-term ecological stewardship and alignment with national and international sustainability goals.

2. Scope

This policy applies to:

- All TQTI campuses, departments, and training activities
- Staff, learners, contractors, and visitors
- Procurement, infrastructure, and resource management

3. Policy Commitment

TQTI pledges to:

- Integrate sustainability into decision-making and strategic planning
- Reduce carbon footprint through energy-efficient practices
- Promote circular economy principles (reduce, reuse, recycle)
- Encourage sustainable behavior among staff and learners
- Comply with environmental laws and ISO 14001 principles

4. Sustainability Integration

- Training Delivery: Include sustainability topics in technical and HSE programs
- Procurement: Prioritize eco-friendly suppliers and products

- Facilities: Design and retrofit buildings for energy efficiency
- Digitalization: Promote paperless workflows and cloud-based systems

5. Roles & Responsibilities

Role	Responsibility
TQTI Manager	Lead sustainability strategy and allocate resources
HSE Department	Monitor implementation
Trainers	Integrate sustainability into curriculum & encourage the learner to make the best practice
Admin Staff	Support eco-friendly operations
Learner	Participate in sustainability initiatives

This policy is applied to the related personal mentioned & should be reviewed annually and updated according to the performance

Dr. Samir Al Bahrani

Manager of Institute
